

**Bitmanagement
3D display bundle with BS Contact Stereo (OEM)**

Bitmanagement offers to develop an integration of 3D monitor technology and the stereoscopic visualization component BS Contact Stereo

- “Branding” of the OEM software package according to the display manufacturer’s corporate design and requested user interface

- stereoscopic software package may consist of :
 - ⇒ still picture viewer
 - ⇒ 3D video viewer
 - ⇒ interactive and realtime 3D viewer for 3D models based on ISO standard VRML and/or X3D
 - ⇒ adaption to specifications of the 3D monitor technology (hardware requirement to be checked)
 - ⇒ customization of branding of the software and the user interface
 - ⇒ support of OpenGL and Direct X
 - ⇒ documentation of interfaces
 - ⇒ defined standard animation of a 3D model
 - ⇒ “plug and play” - demo CD (content to be agreed upon)

**➔ Bitmanagement is developing the 3D software in Germany.
Developments on project base. Licensing of software based on revenue share possible (e.g. percentage of bundle price).**
