

3D visualisation with ISO-standards on the internet

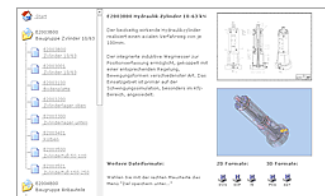

Basic technology in the area of standardised and interactive 3D software

Bitmanagement Software GmbH located near Munich, Germany, is the leading provider of interactive 3D software on ISO standards (VRML, X3D, MPEG-4) for the internet. Customers integrate the basic technology into their product- or service concepts.

The software enables interactive watching, turning, zooming, animating or annotating of your products in 3D mode. Due to the consequent focus on open ISO-standards investment in the technology of Bitmanagement is secure. Typical usage is in the area of investment goods, architecture, medicine or technical documentation.

Your field of usage?

1. Product- and prozess visualisation
2. CAD – visualisation on the Internet
3. Visualisation of machinery
4. Marketing, sales and support documentation
5. Catalogs, manuals
6. GIS – visualisation
7. Avatar / facial animation
8. Medical technologies
9. Architecture – visualisation
10. Learning, technical documentation

Company Profile

Focus	Interactive 3D technology for visualisation and simulation on PC and on the internet.
BS Viewers	BS Contact VRML – BS Contact Stereo The player is commonly used world wide as viewer for technological sophisticated 3D applications and Virtual Reality including stereoscopic viewing. BS Contact MPEG-4 One of the first fully integrated 2D/3D MPEG-4 players for the replay of audio, video and 3D. BS Contact J The JAVA applet is a small and fast plug-in-free viewer suited for product presentation in interactive 3D.
BS Tools	BS Exporter Converts data from 3ds max to VRML 97 for BS Contact. BS Encrypt Encrypts 3D data for the Internet. BS Internet Optimizer Reduces VRML data for BS Contact. BS SDK (COM, EAI, Device, Script, Tutorials) The BS SDK Package includes APIs, examples and documentation for the integration in third party products and for creation of individual applications.
Licensing	Unrestricted use of the player (without turning logo) <ul style="list-style-type: none">- enabled for Internet/Intranet content by URL/domain- enabled for content on single computer by computer ID (e.g. computer name)- enabled for CDROM by content data- enabled for integration in your products and concepts
Download available!	BS Contact VRML can be downloaded without functional restrictions for testing and evaluation purposes.
