

Product portfolio

Focus	Interactive and real-time 3D/multimedia software with the focus on the internet based on the 3D standards VRML/X3D, MPEG-4
3D visualization-components	<p>BS Contact VRML/X3D Software for the visualization of 3D models in VRML/X3D standard</p> <p>BS Contact Stereo Software for the stereoscopic visualization of 3D models</p> <p>BS Contact Geo Software for the visualization of multimedia in GIS</p> <p>BS Contact MPEG-4 Software for the visualization of 3D models in MPEG-4 standard</p> <p>BS Contact Mobile Software for the visualization of 3D models on mobile devices</p> <p>BS Contact J Software for the visualization of 3D models based on JAVA (Plug-in free)</p>
Workflow Tools	<p>BS SDK Paket Documentation and tools for integrating the software into third party products</p> <ul style="list-style-type: none">- a single PC license of the BS Contact VRML/X3D- BS SDK documentation, BS Exporter Tools, BS Encrypt Tool <p>BS Exporter Converter for 3ds max/ Blender to BS Contact VRML/X3D for workflow support</p> <p>BS GeoFormer Modeling tool for elevation and format converter</p> <p>BS Tiler Tool for data preparation for BS Contact GEO</p> <p>BS TrafficSim Tool for creating traffic simulations</p> <p>BS Reducer Decrease the number of polygons in high detailed models without changing the appearance</p> <p>BS Encrypt Encrypts 3D models (Content Encryption) for content security</p>
3D control software	<p>BS Sync + Track Synchronization of visualization PCs and integration of tracking for CAVE solution</p>

For evaluation purposes you may download our software from our Download Center. Bitmanagement customizes the license models to the clients requirements and develops new features, extensions of our software and multimedia projects on project base.
